Two more International contracts for IST!

IST has been awarded two international contracts totalling \$46 million to supply its Once Through Steam Generators (OTSGs), and its Enhanced Oil Recovery (EOR) technology.

In the first contract, IST will design and supply 12 units for Wood Group GTS located in Houston, USA as part of the Dorad Energy 800 MW Combined Cycle Plant. This is the largest single design and supply project to date for IST. The IST units will be used in combined cycle to recover waste heat from new gas turbines and supply superheated steam to two steam turbine generators. The units are scheduled for delivery between late 2011 and early 2012.

In the second contract, IST will design and supply an OTSG for an EOR application that will be located in Lake Maracaibo, Venezuela. The unit has been purchased by Premier Energy Service and will be owned and operated by Petróleos de Venezuela South America (PDVSA). This is IST's fourth EOR contract for PDVSA. The unit is scheduled for delivery in the spring of 2011.

To date, IST has sold 174 units in 19 countries worldwide..

SIMPLY SPEAKING...

we find a better way

This drives our every thought and action, for every project and customer.

Since 1992, IST's philosophy has attracted the industry's most innovative, talented people and inspired us to improve on accepted industry standards with every steam generator installation.

Today, 'finding a better way' has earned us business in 19 countries with over 185 OTSGs in operation worldwide.

And, as you will see in this issue of The Simple Report, the improvements are ongoing- we simply can't help ourselves.
