IST heads to PowerGen International this December!

Join Innovative Steam Technologies (IST) in Las Vegas this December 13th to the 15th for the Power-Gen International conference and trade show.

IST will be exhibiting again this year at Power-Gen, at the Las Vegas Convention Center. If you would like to schedule a meeting with our staff visit our events page, or you can drop by stand number 1515.

IST would like you to be our guest, if you would like us to e-mail you a visitor's pass please e-mail us.

See you there!

SIMPLY SPEAKING...

we find a better way

This drives our every thought and action, for every project and customer.

Since 1992, IST's philosophy has attracted the industry's most innovative, talented people and inspired us to improve on accepted industry standards with every steam generator installation.

Today, 'finding a better way' has earned us business in 19 countries with over 185 OTSGs in operation worldwide.

And, as you will see in this issue of The Simple Report, the improvements are ongoing- we simply can't help ourselves.

IST's SQ90™ business is heating up!

IST will design and supply four SQ90™ 25 MMBtu/hr EOR OTSGs that will be located in Lake Maracaibo, Venezuela. The units have been purchased by Premier Energy Services and will be owned and operated by Petróleos de Venezuela South America (PDVSA). This is IST's fifth EOR contract for PDVSA. The units are scheduled for delivery in January, 2012.

In addition, IST will design and supply one 50 MMBtu/hr EOR OTSG, to be located in Peace River, Alberta. This SQ90™ unit has been purchased by Penn West Petroleum and it will be installed at the Harmon Valley South Pilot Plant, and will allow the plant to produce an industry leading 90% quality steam for injection.

IST will also design and supply one replacement convective module for a 50 MMBtu/hr EOR OTSG that will be located in Lloydminster, Saskatchewan. The unit has been purchased by Universal Industries and will be owned and operated by Husky.

Three more Power Generation contracts for IST!

IST will design and supply two OTSG units for the Lansing Board of Water and Light in Michigan, USA. The OTSGs will be installed in the Reo Town Cogeneration power plant to recover waste heat from LM6000 gas turbines, and provide steam for both a steam turbine generator, as well as industrial process in local area. The units are scheduled for delivery in June 2012.

IST will also design and supply an OTSG unit for Windsor Locks in Connecticut, USA. The OTSG will be installed in the Algonquin Cogeneration Power Plant. It will recover waste heat from a Solar Titan 130 gas turbine and provide steam for the Ahlstrom paper mill and also power generation. The unit is scheduled to be delivered by April, 2012.

In addition, IST will design and supply an OTSG unit for Acarsoy Enerji in Denizli, Turkey. The OTSG will be installed in the Acarsoy Enerji Combined Cycle plant. The unit will recover waste heat from an LM6000 gas turbine. The unit is scheduled to be delivered in February 2012.
