IST is heading to the HRSG User's Group

Join Innovative Steam Technologies (IST) in Houston, Texas this February 27th to 29th for the HRSG User's Group 20th Annual Conference & Exposition.

IST will be exhibiting at the conference which will take place at the Hilton Americas Hotel in Houston. If you would like to schedule a meeting with our staff visit our events page, or you can drop by stand number 419.

See you there!

SIMPLY SPEAKING...

we find a better way

This drives our every thought and action, for every project and customer.

Since 1992, IST's philosophy has attracted the industry's most innovative, talented people and inspired us to improve on accepted industry standards with every steam generator installation.

Today, 'finding a better way' has earned us business in 19 countries with over 185 OTSGs in operation worldwide.

And, as you will see in this issue of The Simple Report, the improvements are ongoing- we simply can't help ourselves.

2011 Plant of the Year Award Celebration!

In a Spanish themed event IST celebrated its 5th annual Plant of the Year Award, with clients and key suppliers from around the world. It took place in Las Vegas, NV during the PowerGen International show 2011. The evening started with tapas, sangria and cocktails at the FIREFLY Tapas Kitchen & Bar restaurant. The night followed with a delicious dinner and an amazing entertainment experience that included flamenco dancers. At the end of the night the 2011 Plant of the Year Award recipient was announced!

The Golden Valley Electric Association (GVEA) Plant, located in North Pole, Alaska was the chosen winner for the 2011 celebration. There are numerous factors that make the GVEA facility stand out as a unique, innovative and productively operated power plant. Some of these factors include:

- Successfully operating the plant in a harsh climate conditions.
- Overcoming all challenges that liquid fuel imposes on major plant equipment.
- Continuously operating this plant 24 hours a day, fluctuating the power output, utilizing a big turn down (an inherent feature of the IST OTSG) and successfully matching grid's demand.
- Continuous focus on the environment, utilizing CO catalyst which is placed into the IST OTSG and water injection in the gas turbine for NOx control.

The amazing Spanish entertainment, great food and the guests who attended made this event a great success and a night to remember! We look forward to honoring the 2012 Plant of the Year Award in Orlando, FL next December.
