IST is heading to the WHOC 2011!

Join Innovative Steam Technologies (IST) in Edmonton, Alberta this March 15th to the 17th for the World Heavy Oil Congress 2011.

IST will be exhibiting this year, at the Shaw Conference Centre in Edmonton, AB. If you would like to schedule a meeting with our staff visit our events page, or you can drop by stand number 2115.

See you there!

SIMPLY SPEAKING...

we find a better way

This drives our every thought and action, for every project and customer.

Since 1992, IST's philosophy has attracted the industry's most innovative, talented people and inspired us to improve on accepted industry standards with every steam generator installation.

Today, 'finding a better way' has earned us business in 19 countries with over 185 OTSGs in operation worldwide.

And, as you will see in this issue of The Simple Report, the improvements are ongoing- we simply can't help ourselves.

2010 Plant of the Year Award Celebration!

IST celebrated its 4th annual Plant of the Year Award in a Polynesian style event, with clients and key suppliers from around the world. It took place in Orlando, FL during the PowerGen International show 2010. The evening started with cocktails at the Paradise Cove Buena Vista Watersports facility. The night followed with a Polynesian style dinner and an amazing entertainment experience that included fire dancers. At the end of the night the winner of the Plant of the Year Award was announced!

The Guaracachi Combined Cycle Plant, located in Santa Cruz, Bolivia was the chosen winner for the 2010 celebration. The Guaracachi CC Plant has overcome many unprecedented challenges and has put into place unique innovations that make this facility stand out as a leading OTSG facility. Some of the unique aspects include: the use of air dilution system to enable dry run capabilities of the OTSGs at elevated gas turbine temperatures, managing one of the most challenging OTSG transportations in IST history and successfully managing the residential noise restrictions.

The Guaracachi CC Plant is using two IST-OTSGs to build Bolivia's first low carbon emission, high complex waste heat recovery plant. Their commitment to environmental responsibility will give them eligibility in the future for carbon credits under the Clean Development Mechanism of the United Nations.

The amazing polynesian entertainment, great food and the guests who attended made this event a great success and a night to remember! We look forward to honoring the 2011 Plant of the Year Award in Las Vegas, NV next December.

IST a speaker at the Global EOR Knowledge Expansion!

IST will be a speaker at the 2011 Global Knowledge Expansion round table workshop at the Al Bustan Palace. The event will take place from March 14th to the 17th in Muscat, Sultanate of Oman.

IST's EOR Senior Development Engineer will speak at this event on March 16th regarding the impact of scaling temperature, increase on carbon steel pipe service life, and reliability.

According to the 2011 Global EOR Knowledge Expansion Round Table Committee the workshop theme "Applied EOR" will be focusing on Chemical, Thermal, CO2 and other gas injection techniques. This event will bring together professionals in areas of injection, surveillance, reservoir characterization and production.
